Thank you for purchasing and using this product!
In order to bring you a better user experience, please carefully read this manual and also refer to the manual of your cell phone or your electronic device.

Product overview

Product Name	TRIPOD SELFIE STICK
Model	SKBZ04
Net Weight	=150g
Length of Telescopic Rod	=580mm (MAX)
Remote Control Range	=10M
Battery Capacity	65mAh
Device Name	HUMIXX
Compatibility	6-inch (and below) smartphones, camera with 1/4" screw head
Product List	Selfie stick x1, Sports camera base x1, Instruction manual x1

The data above are obtained from the testing conducted by HUMIXX Lab. Actual results may vary due to the manufacturing process and other factors. The images shown here are for reference only.

01

Instructions

Remote control connection specification
1. Starting up: Press the remote control button long after 2 seconds, the indicator light (blue light) flashing.

2. Remote control pairing: after start up, the indicator light (blue light) flashes as a pairing state (3 seconds after start up, if pairing is not successfully, it is re-entering the matching state).

Mobile phone using guide

1. Make sure the remote control connection is successful. Turn the folded holder open and spin it to the right angle.
2. Place the tripod in the right position to take a photo.
Note: When using the selfie stick, the remote control can be pushed out slightly by hand, and the remote control range is about 10M.
3. Remote control connection: When the selfie stick is pairing, open the Bluetooth of mobile phone to search, when found the named "HUMIXX", click it to connect automatically, after a successful connection, the indicator light (blue light) often bright, it means the remote control and mobile phone are connected successfully.
4. Open the phone built-in camera function, quickly press the button one time to take pictures.

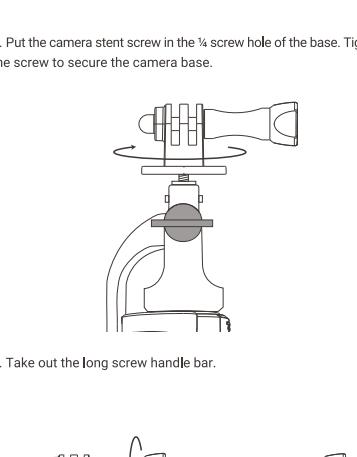

Instruction for tripod

1. Pull the bottom of the selfie stick and open the tripod.
2. Fix the phone on the clamp.
3. Pull the telescopic rod to the right length.
4. Open the phone built-in camera function, quickly press the button one time to take pictures.

Sports camera stent using guide

1. Set the phone clamp back to the original state and rotate it with 180 degree to let it unfold the telescopic rod.
2. Camera stent using guide
1. Set the phone clamp back to the original state and rotate it with 180 degree to let it unfold the telescopic rod.

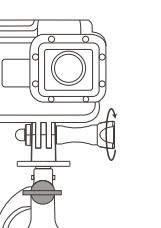

2. Adjust the camera stent screw to fit the camera screw head, then install the camera which has 1/4" screw head. After successfully installing, turn the camera on and you can start taking pictures.

02

2. Put the camera stent screw in the 1/4 screw hole of the base. Tighten the screw to secure the camera base.

4. Insert the sports camera's snap-fit fixture into the camera port and tighten the long screw handle bar to secure the camera.

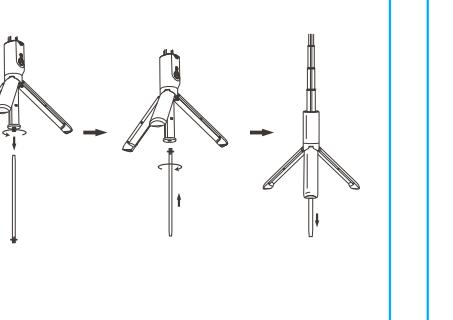

5. After successfully installing, turn the camera on and you can start taking pictures.

Mounting screw instructions

1. If the tripod is used on grass, sand, etc., in order to keep the tripod stable, you can unscrew the mounting screw from the bottom of the telescopic rod.

2. After tightening the mounting screw in the reverse direction, insert it into the soil with force, so that the tripod can firmly support the phone/camera.

09

Attention:
1. When using the mounting screw, the telescopic rod must be pulled out for at least one section. (The tripod cannot be used when the telescopic rod is fully retracted.)
2. After the mounting screw is used, ensure to clean it before inserting it back into place. The thread of the mounting screw should not have mud, otherwise it will not screw back in securely.

Notes
1. Please adjust the angle before taking pictures, please don't shake it to keep the phone safe.
2. Do not shake the selfie stick during use, or may let the phone fall down.

Charging
Remove the remote control and plug in the charging cable to start charging.

3. Sleep settings: In the state of sleep, press the button briefly, the indicator light (blue light) is lit, and then enter the pairing state.

4. Shut down: after start up, no matter what the state, long press the button for more than 3 seconds, the indicator light (blue light) will flash 3 times, after shut down, the indicator lights go out.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

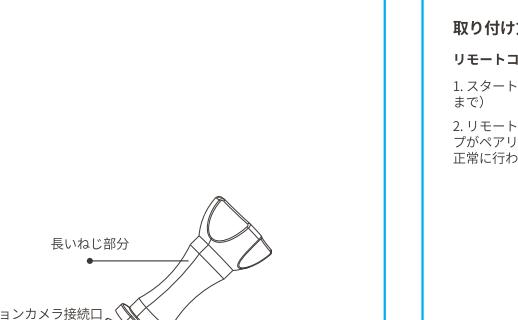

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation.

Upcoming changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Product description

Taking a picture guide
